How to check DC Voltage Parameters on a DVR Saturn

1	Enter Service mode. Please refer to the "***How to enter Service mode on NOVA DVR Saturn***" FAQ.

2	From the main screen, press <**Program P**> 11 times until you get to the page with the parameters showing. Check that the value for "**VD**" should fluctuate around **360v**. Check that the value for "**VDLowLim**" should be at **300v**.	

3	Press <**Program P**> again to go to the next page and check the values: UVtSdSTP = **345v** UVtSdRun = **220v**
